

Mood and transient cardiac dysfunction in everyday life

Mimi R Bhattacharyya and Andrew Steptoe

Electronic Supplementary Material

Figure legends

Supplementary figure 1

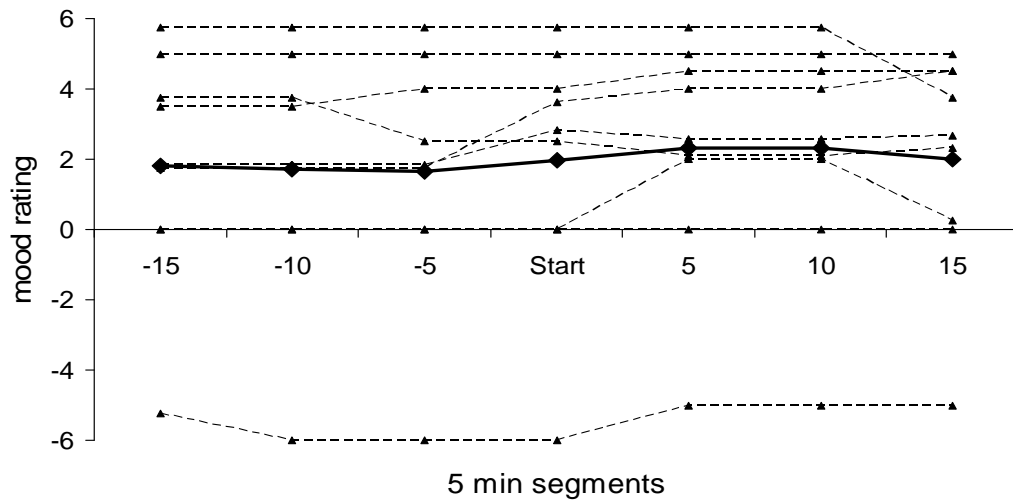

Individual mood ratings during periods of ST depression / ventricular tachycardia (upper panel) and control periods. Each individual is represented by a dashed line. The solid line represents the mean responses, as illustrated in Figure 1 of the article.

Supplementary figure 2

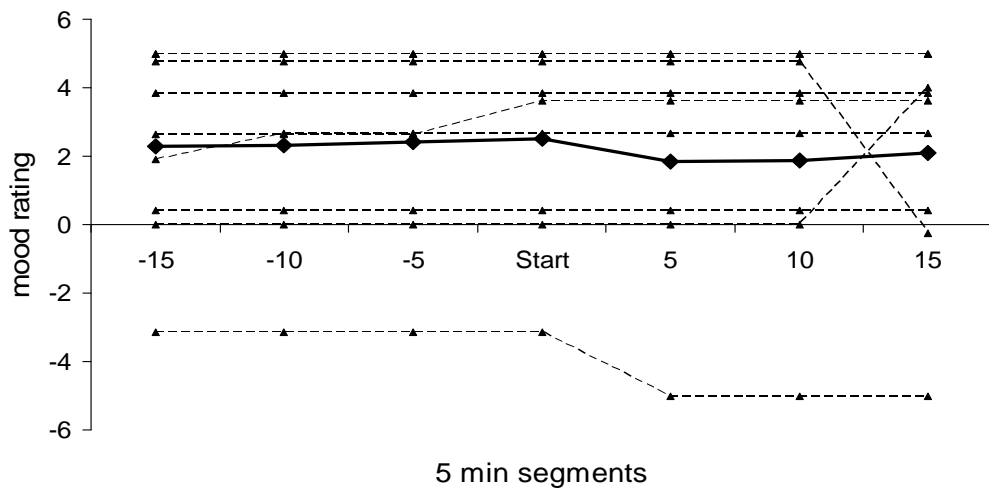

Individual heart rates during periods of ST depression / ventricular tachycardia (upper panel) and control periods. Each individual is represented by a dashed line. The solid line represents the mean responses, as illustrated in Figure 1 of the article.

Supplementary Figure 1

ST depression / ventricular tachycardia period

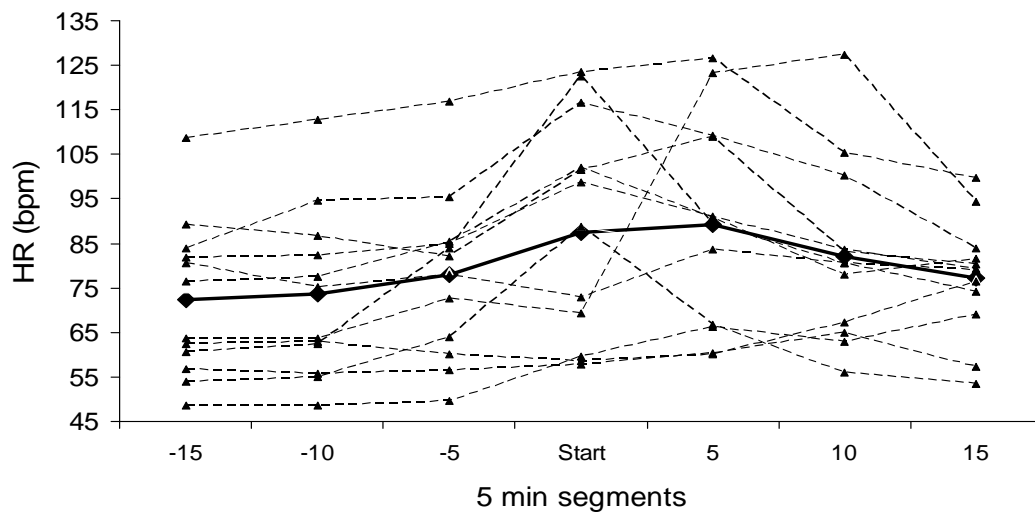

Control period

Supplementary Figure 2

ST depression / ventricular tachycardia period

Control period
