

Supplemental Table 1: Second-order factor analysis for HCl subscales.

Subscale	Factor1	Factor2
Practical Impact	0.778	
Symptom Impact	0.6594	
Social Impact	0.8835	
Physical Impact	0.8926	
Emotional Impact	0.8794	
Financial Impact	0.8044	
Lifestyle Impact	0.8938	
Positive Emotions		0.9788

Supplemental Table 2 HCI Intercorrelations

	Practical Impact	Symptom Impact	Social Impact	Physical Impact	Emotional Impact	Financial Impact	Lifestyle Impact	Positive Emotions
Symptom Impact	0.5135		1					
Social Impact	0.6075	0.4443		1				
Physical Impact	0.6035	0.505	0.7869		1			
Emotional Impact	0.6113	0.5046	0.7908	0.811		1		
Financial Impact	0.5863	0.4644	0.6876	0.6916	0.6395		1	
Lifestyle Impact	0.6461	0.5184	0.7783	0.7849	0.742	0.6935		1
Positive Emotions	-0.1106	-0.0648	-0.1388	-0.0533	-0.1309	-0.0117	-0.0942	1

 small correlation: unrelated constructs ($0.10 < \text{Pearson's } R < 0.40$)
 moderate correlation: related but not overlapping constructs ($0.50 < \text{Pearson's } R < 0.80$)
 large correlation: overlapping constructs ($0.80 < \text{Pearson's } R$)

Supplemental Table 3: Incremental Validity Analyses
Polytomous logistic regression predicting severity*

Model	Severity	Predictor	RRR*	Std. Error	P value	Pseudo R2	N
1	Moderate					0.01	456
	Severe	PedsQL Parent HQRL Summary Score	0.98	0.01	0.09		
2	Moderate	PedsQL Parent HQRL Summary Score	0.98	0.01	0.09	0.00	455
	Severe	PedsQL Family Functioning Score	0.99	0.01	0.17

* Mild severity is the reference group; RRR= Relative Risk Ratio.

Supplemental Table 4a: Discriminant Validity Analyses

Univariable logistic regressions using subscale scores
to predict use of prophylaxis by the index patient*

Dependent Variable: Being on prophylaxis regimen (0=not on prophylaxis, 1= on prophylaxis)

Predictor	Odds Ratio	Std. error	P value	N	Pseudo R squared
Practical Impact	1.00	0.01	0.75	455	0.00
Symptom Impact	0.99	0.01	0.42	443	0.00
Social Impact	1.02	0.01	0.16	454	0.00
Physical Impact	1.01	0.01	0.25	455	0.00
Emotional Impact	1.01	0.01	0.27	457	0.00
Lifestyle Impact	1.03	0.01	0.04	456	0.01
Financial Impact*	1.02	0.01	0.07	455	0.01
Positive Emotions	1.02	0.01	0.04	454	0.01
Burden Summary	1.01	0.01	0.24	430	0.00

Supplemental Table 4b: Univariable logistic regressions using subscale scores to predict number of people they are caring for.

Dependent Variable: Number of people with hemophilia for whom providing caregiving support (0=1 person with hemophilia, 1= more than one person with hemophilia)

Predictor	Odds Ratio	Std. error	P value	N	Pseudo R squared
Practical Impact	1.02	0.01	0.03	455	0.01
Symptom Impact	1.01	0.01	0.23	443	0.00
Social Impact	1.01	0.01	0.32	454	0.00
Physical Impact	1.01	0.01	0.40	455	0.00
Emotional Impact	1.01	0.01	0.36	457	0.00
Lifestyle Impact	1.01	0.01	0.31	456	0.00
Financial Impact*	1.02	0.01	0.10	455	0.01
Positive Emotions	0.98	0.01	0.07	454	0.01
Burden Summary	1.02	0.01	0.17	430	0.00

p< 0.05 p<0.10

These analyses use the WHOLE SAMPLE. *Financial Impact score was the mean of non-missing items.
