

Default Question Block

PAIGE

Podiatrists in Australia - Investigating Graduate Employment.

There are many factors which podiatrists consider when choosing where to work. Additionally, many health professionals are confronted with burnout and their own mental health challenges. We are interested in determining how these factors apply to you and your situation.

This is the 4th survey of the PAIGE study. Surveys 1 and 2 were conducted just in Victoria and now we are expanding for a second year to the whole of Australia.

We strongly encourage you to repeat this survey even if you completed it in 2019 to capture any changes in your work practices.

You are invited to take part in this research if you are a podiatrist working in Australia. We are interested in EVERY podiatrist working in Australia being part of this study. Your responses are essential for this research to achieve it's aims.

Detailed information about these factors are essential for future workforce planning in the podiatry profession. This study is similar to others underway in medicine and nursing. Exploration of these factors has not been undertaken in this detail for allied health, and particularly not in the podiatry profession.

The information that you provide in the PAIGE study will be used to:

- Understand how life impacts on workplace decisions
- Improve the access to podiatry services for every Australian, particularly in rural and regional areas
- Improve the evidence base informing podiatry workforce policy

This research is being undertaken by researchers at Monash University (A/Prof Cylie Williams, Anna Couch, Dr Belinda O'Sullivan, and Prof Terry Haines) and La Trobe University (Prof Hylton Menz).

It is not expected that you will directly benefit from this research and there is no payment for being part of this research.

At the end of the survey you may choose to enter a draw to win:

- One (1) of ten (10) \$100 vouchers for Continued Professional Development sessions or conferences delivered by the Australian Podiatry Association. You do not have to be a member of the APODA to use.

If you choose to leave your contact details to receive results, you can be assured that your contact details will not be subsequently linked to your survey responses. You will see this by the survey window opening up a new survey.

This survey will take up to 30 minutes depending on if you have completed it before. You can complete it in your own time and it is important that the whole survey is completed.

You can withdraw at any time by closing your Internet browser window. Being part of this study is voluntary. However, if you do consent and answer questions, anything you have answered may be used within the research. You will not be able to withdraw the answers to any questions you have answered.

This study has been partially funded by the Australian Podiatry Association to support a research worker, and researchers on the team are supported by fellowships and a stipend through the National Health and Medical Research Council and the Australian Government Research Training Program.

The results of this survey are confidential. You will not be asked to give any identifying information in a way that your results can be matched to you. Answers are being collected through Qualtrics and you can access the privacy policy here: <https://www.qualtrics.com/privacy-statement/>

Any provided information and details (in separate survey) will only be viewed by the research team. The collected responses will be stored in accordance with Australian Privacy Regulations, and will be kept as a password protected data file stored on a cloud based server for 15 years. If there is future funding of this project, your responses to this survey may be linked to your responses in future surveys. A report of this study will be submitted for publication. No individual responses will be identified in any publications.

A newsletter containing key survey results and information about how results are being used to advance the podiatry profession will be produced during this project and shared with participants and funder. You have the option to provide your email address to receive this at the end of the survey. It will not be linked with your survey responses.

If you would like to contact the research team about aspects of this study or have a complaint concerning the manner in which this research is being conducted, please contact the principal investigator:

Cylie Williams: cylie.williams@monash.edu

OR

Should you have any concerns or complaints about the conduct of the project, you are welcome to contact:
 Executive Officer, Monash University Human Research Ethics (MUHREC) Room 111, Chancellery Building E, 24 Sports Walk, Clayton Campus Research Office, Monash University Tel: +61 3 9905 2052 Email: muhrec@monash.edu Fax: +61 3 9905 3831

If you completed the 1st, 2nd or 3rd survey in 2017, 2018 or 2019 please enter the same code that you created in survey one.

If this is the first PAIGE survey you have complete and to consent to being part of this research, please create your code to enable your answers to be linked during subsequent rounds.

To create this code, please use:
 - **Your two (2) initials and two (2) digits of the date in the month of your birthday.**

e.g. Cylie Williams and birthday date in the month is 28, the code example is CW28

If you have a double surname (e.g. Smith-Peterson), only the first initial - S should be used as the code should be only 4 digits.

1. Have you completed the Round 3 PAIGE survey

- Yes
- No
- Can't remember

2. Are you in the same job since the beginning of 2019?

- Yes
- No

	Strongly Disagree	Disagree	Agree	Strongly Agree
Searching for the answer to a question is, in and by itself rewarding	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Life-long learning is a professional responsibility for all health practitioners	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I enjoy reading articles in which interest of my professional interest are discussed	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I routinely attend annual meetings run by professional podiatry organisations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I read professional journals at least once every week	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I routinely search computer databases to find out about new developments in podiatry	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I believe that I would fall behind if I stopped learning about new developments in my profession	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
One of the most important goals of university is to develop students' life-long learning skills	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Rapid changes in medical science require constant updating of knowledge and development of new professional skills	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I always make time for self-directed learning, even when I have a busy work schedule and other professional and family obligations	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I recognise my need to constantly acquire new professional knowledge	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Strongly Disagree	Disagree	Agree	Strongly Agree
I routinely attend continuing podiatry education programs to improve patient care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I take every opportunity to gain new knowledge/skills that are important to my profession	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
My preferred approach in finding an answer to a question is to search the appropriate computer databases	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
